

EGIDA PROJECT

COORDINATING EARTH AND ENVIRONMENTAL CROSS-DISCIPLINARY PROJECTS
TO PROMOTE THE GLOBAL EARTH OBSERVATION SYSTEM OF SYSTEMS (GEOSS)

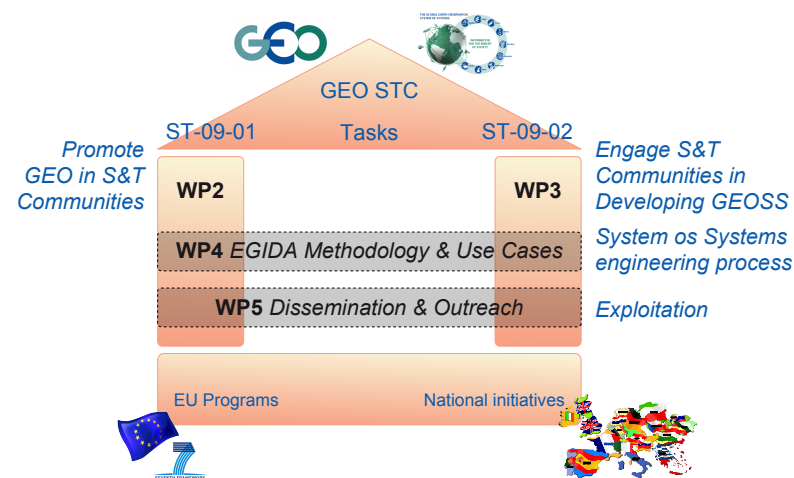

www.egida-project.eu

About the EGIDA Project

- » EGIDA will deliver evaluation processes, tests and assessment indexes, expertise databases, a “geo label” concept, surveys and other instruments designed to help link relevant European S&T communities to GEOSS and ensure it is built using **state-of-the-art science and technology**
- » These deliverables will link relevant **European S&T communities** to GEOSS and ensure it is built using state-of-the-art science and technology
- » EGIDA supports the GEOSS S&T Committee, and the development/implementation of the **GEO S&T Roadmap**
- » **EGIDA's S&T methodology** will be transferred to developing countries to assist in assessment of hot spot chemical pollution and air quality for health

- » EGIDA includes an **advisory board** and **Stakeholders network** to better reach out to S&T community
- » EGIDA stakeholders are located in **Europe, United States, Brazil, South Africa, Turkey, China, Japan** and **Australia**

Participating Organizations

IVL Svenska Miljöinstitutet
